Nikkos Rose

Software Developer
Buffalo, NY 14214 | (347) 988-6291 | nikkosjrose@gmail.com | nikkosasc4.github.io | linkedin.com/in/nikkosrose

Summary

Software developer with 2.5+ years of experience building and supporting production applications in C# and .NET, combined with a consistent track record of technical training delivery and team leadership. Skilled in full-stack feature development, SQL-based troubleshooting, customer-facing technical support, and software deployment on production systems.

Skills

HTML/CSS/Javascript, C, C++, C#, .NET Framework, WPF, MVVM, DevExpress, SQL, Software Development, Software Deployment, Technical Support, Troubleshooting, Training & Instruction, Code Review, Software Testing & QA, Version Control (Git), Agile/Scrum Practices

Experience

Systems & Process Developer — EtaPRO LLC (a Toshiba Group company), Buffalo, NY *(May 2024 – October 2026)*

- Served as subject matter expert on EtaPRO's power plant performance monitoring application, delivering 6+ hands-on training sessions to customer teams and resolving 100+ technical support tickets end-to-end.
- Led software upgrade deployments on customer production systems, troubleshooting issues in real time to minimize downtime and disruption.
- Queried and analyzed application data using SQL to diagnose and resolve customer-reported issues.
- Modularized reusable application components, improving development efficiency across related projects.

Software Engineer Intern — EtaPRO LLC (a Toshiba Group company), Buffalo, NY *(May 2023 – May 2024)*

- Collaborated with a mentor developer to design and implement a new log viewer feature using C#, .NET, DevExpress, WPF, and MVVM.
- Participated in regular code reviews and daily standups to receive feedback and enhance code quality.
- Conducted comprehensive testing, individually and alongside a mentor, to identify and resolve software bugs and inconsistencies.

Teaching Assistant, CSE 115/116 — University at Buffalo, Buffalo, NY *(September 2022 – May 2024)*

- Guided 10-20 students weekly through core computer science fundamentals (control flow, sorting algorithms) during lab sessions.
- Held office hours supporting 5-30 students per session, improving comprehension and project completion.
- Assessed and graded final capstone projects each semester.

Lead Instructor — All Star Code, Remote *(June 2021 – August 2021, June 2022 – August 2022)*

- Designed and delivered a six-week technical curriculum (HTML, CSS, JavaScript) to two cohorts of 20 high school students (40 total) each summer.
- Managed a 3-person instructional team (Teaching Assistant, Teaching Fellow, Summer Intensive Coordinator).
- Served as primary liaison across parents, students, donors, and program leadership, ensuring aligned expectations and smooth program delivery.

Technical Events Manager — All Star Code, Remote *(February 2021 – March 2021)*

- Directed 12 student-built technical demonstrations from ideation through launch within a six-week program.
- Coached students on technical presentation and delivery for external stakeholders.

Teaching Assistant — All Star Code, New York, NY *(June 2020 – August 2020)*

- Supported lead instruction for a 40-student cohort of Black and Latino high school students in a program hosted by Goldman Sachs.

- Led daily office hours, delivering 1-on-1 technical coaching.

Annotation Contractor, Topic Search — Reddit, Inc., Remote *(May 2020 – May 2021)*

- Contributed to the development and launch of Reddit's "topic pages" feature, a subject-based content discovery tool shipped platform-wide.
- Served as a quality-assurance checkpoint, validating and publishing topic pages before production release.
- Categorized and evaluated subreddit content against MPAA-style rating standards to support platform content-safety compliance.

Education

Bachelor of Arts in Computer Science — University at Buffalo, Buffalo, NY | May 2024
National Society of Black Engineers; Boxing Club
